NKOSINATHI NICHOLAS MASANGO

SUMMARY

Final-year Informatics student at Tshwane University of Technology, currently gaining practical experience at the 4IR Research Lab as a Full Stack Developer. In this role, I work across both front-end and back-end development — building user interfaces, designing and managing databases, developing server-side logic, and ensuring seamless integration between systems.

I specialize in Project Management, Business and Systems Analysis, System Testing, Database Administration, and Data Management and Analytics. Having completed all theoretical modules, I am eager to apply my knowledge in real-world projects, continuously learn, and contribute meaningfully to innovative solutions.
